

Installing WinDoor for Windows and Macintosh

1. Double click the downloaded *WinDoor25.0.xMac.zip* or *WinDoor25.0.xWin.zip* if it has not auto-expanded after download, then save or move the resulting *WinDoor 25 Mac* or *WinDoor 25 Win* folder to a convenient location like the Desktop.
2. In Vectorworks 2020, go to the Tools menu/Options/Vectorworks Preferences, click on the User Folders tab, then click the *Reveal in Finder* button (Mac) or *Explore* button (Win) at the top of the dialogue. This will open your current user folder titled "2020". Leave that folder open, then return to Vectorworks, close the preferences dialogue and quit.
3. Now return to the Finder (Mac) or Explorer (Win) and arrange the windows so you can see both the downloaded *WinDoor 25 Mac* or *WinDoor 25 Win* folder and its contents, as well as the Vectorworks 2020 user folder.
4. Expand the 2020 user folder, then open the Workspaces folder in both locations. Copy the applicable workspace file (*Architect + WinDoor.vww* or *Fundamentals + WinDoor.vww*) into the Workspaces folder in the user folder. Close the two Workspaces folders.
5. Open both the Plug-ins folders and copy the *WinDoor 25* and *OzCAD Preferences* folders across to the Plug-Ins folder in the same way.
6. Open the *Libraries/Defaults* folder in the 2020 user folder, then open the *Libraries/Defaults* folder in the downloaded WinDoor folder. Now copy the folder called *Reports~Schedules* to the user folder location.
7. Open the *Libraries/Object Styles* folder in the 2020 user folder, then open the *Libraries/Object Styles* folder in the downloaded WinDoor folder. Now copy the folder called *WinDoor* to the user folder location, then copy the *WinDoor.vwx* file in the Data Tag folder to the *Libraries/Object Styles/Data Tag* folder.
8. Launch Vectorworks then go to the Tools/Workspaces sub-menu and choose the *Architect + WinDoor* workspace. The tools will appear in the *Building Shell* and *Dims/Notes* toolsets and the menu items in the *AEC* menu. Alternatively, use the Workspace Editor to add the three tools and three menu commands to your favourite workspace.
9. You are now ready use the WinDoor.

Registering WinDoor

After installing WinDoor, launching Vectorworks and switching to a workspace containing WinDoor, take the following steps to register the software.

1. Place a WinDoor object in the drawing, then click the Copy or Apply Styles button in the Object Info palette.
2. Click the *Register WinDoor...* button, enter the supplied WinDoor serial number, then click OK.
3. The software is now registered.
